

You will need:

Easy Adjust Channel
Easy Adjust Wedge & Gasket Kit
Top Trim – floor or facia connect

Tools needed:

Easy Adjust Combi Tool
Easy Adjust Glass Adjustment Tool

1. Install the channel and fix down as per the stated instructions. If using floor connect top trim, make allowance for how this will fit before installing the channel.
2. Before installing the glass, take the top trim and press down onto the edge of the channel. Take care that you install it on the correct side; facia connect top trim goes on the outer edge, whilst floor connect top trim will go on the inside edge.
3. After the top trim is connected to the side of the channel, install the outer/fall side rubber gasket using the Easy Adjust Combi Tool where needed.
4. Now install the glass according to relevant instructions, using the Easy Adjust Glass Adjustment Tool.
5. Once the glass is in place and aligned, take the inner gaskets and install, using the Easy Adjust Combi Tool where needed.

Where the top trims are in place, the gasket fits between the top trim and the glass, just like it originally fitted between the channel and the glass.
